

# The Anatomy of a Cat

## The Butt

The butt is a very important role to play. If you are a cat butt you must stay calm while your host licks you, (learn more about cat licks in the section below).

## The Tongue

Cat tongues are very painful on bare skin since they have hooks that are made out of keratin. If you are a cat butt, give up your job and become a paw.

## The Tail

Tails are easy to be, all you do is swish around and cover the butt.

## The Paw

It is fun to be a cat paw. The reason why that is is because you get to scratch humans! If you are a cat that your mean human got rid of your claws, you're out of luck.
